

WHAT IS CLAIMED IS:

1       1.     An EMI suppressing cable, comprising:  
2               a core wire bundle, including:  
3                       a plurality of core wires, respectively covered  
4                       with insulative covering layers; and  
5                       ferrite compound-mixed resin layers,  
6                       respectively covering the insulative covering layers;  
7                       a shielding layer, covering the core wire bundle; and  
8                       a sheath layer, covering the shielding layer.

1       2.     The EMI suppressing cable as set forth in claim 1, wherein  
2     the insulative covering layers and the ferrite compound-mixed  
3     covering layers are formed by an extrusion formation.

1       3.     The EMI suppressing cable as set forth in claim 1, wherein  
2     the shielding layer is comprised of at least a metal-braided  
3     wire layer, a metal tape layer and a mesh metal mixed resin.
